WORK EXPERIECE

Digital Analyst / Product Owner – SumSum, Leuven (Cronos Company)

2023 – 2024

- Manage stakeholders (end-clients, third-party, other internal business units)
- Create a product vision for a software application throughout the products lifecycle
- Create product roadmaps to forecast timings.
- Create a backlog and perform the execution within the deadline.
- Gather requirements from stakeholders across multiple business units.
- Guide and support product teams into the direction of the product vision.
- Design wireframes, mockups and prototypes using Figma.
- Conduct user interviews with key stakeholders in order to gather business or functional insights.
- Facilitate scrum rituals for the development team.

Full stack / Analyst Developer – Craftworkz, Leuven (Cronos Company)

2019 – 2023

- Stakeholder management to align on the delivery of new functionalities
- Functional analysis of business requirements and their impact on existing systems.
- Requirement engineering for software features.
- Create software diagrams as part of software documentation.
- Developing and supporting legacy and greenfield software applications in various technologies.
- Analyze and migrate data from legacy systems to databases.
